

Pre-Mission General Procedure (Before First Flight)

Steps

1. Assemble (as needed) UAS
 - check any and all screws
 - blades correctly mounted (cs and ccw tightened appropriately)
 - legs, arms correctly mounted
 - Gimble (if needed, correctly mounted and balanced?)
 - Velcro for battery system in good condition (Matrix)?
2. Turn on GCS and check
3. Boot up Mission Planner Software, check
4. Plug in Telemetry Radio (if applicable)
5. Conduct Safety Briefing
6. Follow pre-flight instructions
